# Montana State Library Digital Library Work Plan January – June 2018

Green (no font distinction) – activity progressing as expected.

Yellow (italicized) – activity may be delayed but the delays do not necessarily rise to the level of Commission concern

Red (bolded) – activity is delayed and Commission attention is warranted

Blue (underlined) – addition or change to the original work plan.

## Strategic Framework – Foster Partnerships

Note: Work plan objectives will be evaluated and reprioritized to reflect the impact of budget reductions.

### **Activities:**

- Develop or purchase an updated request-tracking tool to ensure consistent tracking of patron requests across the library and to enable better agency wide outreach planning and information product development.
  - I have tagged this as green for now because we do not have any benchmarks or milestones (or even a target completion date) determined yet. That should be a minimum target to reach before the next commission meeting to keep this from changing to yellow
  - Update, July 2017 With the loss of the MSL Web Programmer the information products team has taken on additional support duties and current efforts are focused on building familiarity with the code base of existing Digital Library web applications. As a result, the request tracker project is on hold indefinitely.

Inputs Outputs	Outcomes	Impacts
----------------	----------	---------

Staff time to identify	Any easy to use tool that can	Staff track requests in a consistent	Patrons see value in MSL
requirements.	be used by all MSL staff to	manner which allows us to better	services
	track calls, visits, and other	understand how users access and use

Stakeholders	Knowledgebase		
			Staff are more responsive to
	Maintenance Plan		user needs
			Licers have access to MCL's
			Users have access to MSL's
			expertise and curated
			information to resolve their
			needs

- Develop a Digital Library plan for structured outreach activities across the Digital Library that guides the activities of the GIS Coordinator, the Outreach and Electronic Resources Librarian, the Montana Natural Heritage Program Coordinator, and the Digital Library Administrator.
  - User Services has outlined work group responsibilities, which is a necessary first step for this outreach planning. Similar to the request tracker project we need to have more specific target dates in place before the next commission report.
  - Update, July 2017 User Services has created an initial list of outreach opportunities and is seeking input from other Digital Library staff for information about additional events that we should try to attend in FY2018.

Inputs	Outputs	Outcomes	Impacts
Staff time to identify	A plan that identifies	Digital Library programs are more	Currently the biggest limitation
outreach priorities	attainable outreach goals for	coordinated in their outreach effort	on the usage of MSL resources
	the remainder of the fiscal	and more deliberate in making	is that users do not realize what
Inventory of existing,	year with a process for	decisions on which events to attend,	is available or do not
regularly attended events	reviewing, updating, and	activities to offer, and trainings to	understand how to use it.
(MAGIP, NSGIC, MACO, etc)	extending the plan through	host.	Coordinated, deliberate
	FY18.		outreach should allow us to

would like to engage with.	customized or supplemented	discuss Digital Library products and	better understand how our
	for specific events.	services appropriate to the	work can complement the work
		stakeholders they are engaged with.	that they do.

- Make the Natural Resource Information System Advisory Committee active again and update the NRIS Core Funding MOU.
  - We need to fill open NRIS Advisory Committee seats (DNRC, Dept of Ag) before the end of March to ensure an update MOU is signed by June 30. Should target April 30 as a deadline for having a draft updated MOU to distribute among partner agencies.

- Update, July 2017 While well behind schedule, a draft of an updated NRIS MOU has been distributed to NRIS Advisory Committee members and a tentative NRIS AC meeting date has been set for August 7.
- Develop partnerships beyond NRIS data partners to enhance State Publications, Natural Resources, and MSDI Collections (Professional Development as well?)
  - This is a longer-term project. While I think we can be having some discussions with partners now, I think some of this will follow the initial NRIS Advisory Committee meetings.

Inputs	Outputs	Outcomes	Impacts
Staff and agency rep time to meet, review existing MOU, and create a framework for updating or creating a new agreement	An updated memorandum of understanding between NRIS and core funding agencies that may also be used to encourage other non-named agencies to partner with and support MSL programs and services	MSL better understands the needs of partner agencies and agency NRIS Advisory Committee representatives are more informed of MSL resources.  Agency NRIS AC representatives are comfortable communicating with staff in their agencies and with their partners about MSL has to offer.	A supportive set of core partnerships that serves as the foundation for establishing additional funding and data source partnerships.
		Usage of MSL resources increases and time spent explaining the value when invoices are sent to partners is minimized	

- Create new MARC records for electronic resources for digitized state publications.
- Clean up existing MARC records for print state publications.
  - Update, July 2017 This project has been delayed when staff time was diverted to implement space reductions. Staff hope to complete the project by the end of September.

Inputs	Outputs	Outcomes	Impacts
Jim Kammerer will work with MSC staff and Kenny Ketner to establish project roles and responsibilities for creating new records and cleaning existing records.  Project team will decide how to store MSC records for non-circulating print items that have been digitized.  Standardize the hyperlink text in the 856 field for all records.  Delete records for print items that cannot be found and have an equivalent record for digital version.	Revised SIRSI template for how MSL and State Government Information Center (SGIC) items are cataloged. Items in home location of STATE-PUB will switch to ONLINE. SGIC collection will grow in size. Makes MARC records for electronic resources available for import by any library, not just MSC libraries. Global access to state publications.	Cleaner, more accurate library catalog records.  Better user experience; less confusion about what is available from catalog. Absence of circulation protects print state publications from possible loss, damage.  Fewer interlibrary loan (ILL) requests for already digitized items.  MSL collection shifts to more digital content, which aligns with collection development policy preference for digital over print content.	By reducing barriers to information access a higher level of transparency in state government is achieved Improved information discovery aides research critical for decision making processes. Improved collection management strengthens partnerships with existing and potential MSC and state depository library partners.

# Strategic Framework – Create a useful information infrastructure

### **Activities:**

- Update the Montana Cadastral Application
  - o Initial planning steps are under way. I only made this one yellow because I am concerned about the potential for the new DOR Non-disclosure rules to impact the data exchange and thus complicate the development process I very much hope it will not play out that way.
  - Like the Request Tracker, we do not have any benchmark's or milestones (or even a target completion date) determined yet. That should be a minimum target to reach before the next commission meeting.
  - O Update, July 2017 Like the Request Tracker update, this project has been delayed indefinitely due to the loss of staff and the need to review application development priorities. This remains a top priority for both MSL and the Digital Library, but without the support of a dedicated programmer position within the IT group we need to evaluate the best path forward to ensure we can maintain an update cadastral application in the future.
  - Prior to planning for budget cuts, it was decided that this project should be split into two projects.
     The first will address updates to the user interface. Additionally, there is a need to identify a better approach to managing access to the property record card data provided by the Department of Revenue.

Inputs	Outputs	Outcomes	Impacts
Info Products, Land Info, and IT Staff time	A more robust cadastral application that we are able to maintain with existing, in	A reduction in the number of recurring complaints and bug reports	As one of the most used applications in Montana state government, the cadastral
Input from the Department of Revenue and users	house staff and update as needed without a full re- write	An increased ability to be responsive to user suggestions for improving the application	application Is a natural opportunity for us to reach out to and engage users. The first step in doing this is ensuring

	that the application itself is well
	designed and reliable.

# Standardize drought and water supply map data reporting

- Like the Request Tracker, I have tagged this as green for now because we do not have any benchmark's or milestones (or even a target completion date) determined yet. That should be a minimum target to reach before the next commission meeting to keep this from changing to yellow
- Update, July 2017 This project remains on track based on the original goals. In part as a result of
  this work, DNRC is seeking to have the Montana Climate Office play a larger role in the drought
  mapping process and the monthly Drought and Water Supply Advisory Committee meetings. We are
  not clear on what impact this may have on the MSL/WIS role in these activities but we hope to have
  more information to report at the October commission meeting.

Inputs	Outputs	Outcomes	Impacts
Staff - Primarily WIS Manager	single webpage delivering the data/maps/products	monthly drought status map is produced in objective manner	drought map is produced more efficiently (committee members
Staff - IT (web programming)	used to produce the monthly drought status map	users understand why a county is assigned a	spend less time each month)
Copyright/ownership/terms		particular drought category (transparency)	products used to create the
of use (for products such as	list of products used by the		monthly drought map are
PRISM, VegDri, etc.)	Drought Committee to make the monthly map	DNRC Drought Coordinator and Gov. understand when to issue a "drought alert"	readily available to watershed groups and other interested
