

Director's Station

Introduction

Director's Station is a web based product used to extract statistics from the system. These reports can be customized and used for analysis of the library's collection, users, circulation, and cataloging statistics.

Browser Compatibility

The current version of Directors Station (v4.9.1) is compatible only with Internet Explorer version 7 or with IE versions 8 or higher set to use Compatibility View ([How to set compatibility view for IE10](#)) or ([How to set compatibility view for IE11](#)). It is not compatible with Firefox versions 4 or higher or with Google Chrome, Opera or Apple Safari browsers. There are several browser add-ons for Firefox and Chrome that will enable them to render Directors Station web pages in IE 7 standards mode. Search for "IE tab" in Mozilla or Chrome add-ons for more info.

How Do I Log In?

The MSC Directors Station server is remotely hosted by SirsiDynix. To connect, point your IE compatible browser to: <http://dsmtsc.sirsi.net/DirectorsStation/>. Enter your "Username:" and "Password:". If you have never been issued a Username and Password by MSC Support, or have forgotten your login, please submit a ticket on the [MSC online help desk](#) with "Directors Station" as the help topic.
