Montana Coronavirus Map and Dashboard Metadata

For assistance, please [e-mail](#) or call the [Montana Joint Information Center 1-888-333-0461](#)

The information* is updated at 10:00 a.m. daily.

Total Confirmed Cases: This includes all reported Montana residents with lab-confirmed novel coronavirus infections, and non-Montana residents who were diagnosed with novel coronavirus infections while in Montana.

New Cases Indicator: Daily aggregate of new cases in Montana by county for the previous full day. Updates to the information are run by 10 a.m. daily.

Total Confirmed Cases and New Daily Cases by County (List of All Counties): List of all counties in Montana. Sorted by the highest number of new cases reported for the county and then alphabetized by County Name.

- **List Action:** When selecting a County in the list the selected county will flash in pink on the map.

Map – Interactive thematic map of Montana displaying the number of confirmed COVID-19 cases by county. The darker the color, the higher the amount of confirmed cases. Total number of confirmed cases is labeled for all counties with confirmed cases.

- **Home button:** Select to return to the full extent of the state of Montana.
- **Legend:** Select to view the map legend.
- **Identify:** Tap/Click on a county to open a pop-up to identify the county name demographic information for the selected county.
- **Selection:** When you click on a county or multiple counties, the graphs in the bottom right corner (Cases by Day and Cases by Age Group) will change to reflect the information for that county or selected counties.
- **Zoom In/Out:** Plus button zooms in and minus button zooms out.

Total Deaths - Aggregate of reported COVID-19 related deaths in Montana by County.

Recovered - Aggregate of reported COVID-19 recoveries in Montana by County.

Total Tests/New Tests Indicator – Total number of tests run and the daily number of tests run.

Hospitalizations – Aggregate of reported COVID-19 related hospitalizations in Montana by County. This includes the total number of cases that were hospitalized at any point during the course of their COVID illness, it is not the current number of hospitalizations.

Cases by Day – Line graph depicting the amount of confirmed cases by date. First case reported in March 13, 2020. Click on data point and see the date and number of cases reported for that date.

Total Cases by Age Group – Pie chart depicting the amount of confirmed cases by age group. Click on pie slice to view the age range and number of cases within that age group.

Female Cases by Age Group – Pie chart depicting the amount of confirmed female cases by age group. Click on pie slice to view the age range and number of female cases within that age group.

Male Cases by Age Group – Pie chart depicting the amount of confirmed male cases by age group. Tap/Click on pie slice to view the age range and number of male cases within that age group.

*It is possible that DPHHS may receive new information on the current day that will be reported in the map and dashboard. If this does occur, those numbers will be reflected as New Cases the following day.
