

## #2 Moderate Plan

This is an example of how the menu of circulation rules would look. The below rules currently represent the circulation rules for 78.6% of items in the system.

### Other Changes

- Work to remove all Item Types & Home Locations with less than 100 items in them
- Unusual item types will share 1 rule & users who want to use the item type will adopt it (for example, KIT, ILL, etc.); they can use the special due date function for variation.
