Karen Strege, State Librarian

This report contains statistical information for all 79 public libraries in Montana. The Montana State Library (MSL) has statutory responsibility to collect statistical information from these libraries. The State Library cooperates with the Federal-State Cooperative System (FSCS) program, which develops and compiles national public library statistics for the United States. MSL provides Montana information to the FSCS so that policy-makers, funders, trustees, and librarians can identify trends in the country's libraries services.

We hope Montana's public librarians, trustees, and friends will find this report to be a valuable tool for improving the quality and effectiveness of public library service. The information is designed to be useful both in evaluating past efforts and in many planning activities. Generally, users apply these statistics in two ways -- tracking library performance from year to year and comparing library performance with that of other libraries.

The context of the statistics is important for both types of use. If a library's circulation has decreased significantly from year to year, obvious answers, such as budget reductions, might be identified. However, significant decreases or increases may not be as easily explained, and the librarian and trustees must investigate these changes to either remedy problems or to continue beneficial activities. Such longitudinal analysis should use statistics from as many years as possible to accurately forecast trends.

Comparisons must be made between like entities in order to be meaningful. The report attempts to help the users do so by dividing libraries into groups that serve similar populations. However, even within these population groups, wide variations exist between individual libraries. Before using the statistics to make comparisons, check for similarities in other factors, such as income, hours of operation, collections, and mission, goals, and objectives. Users must also consider other libraries' situations, such as local economic conditions or a move to a new building, other than measurements, when using the report to make comparisons.

The information in the report is presented in two main sections: Performance Measures and General/Service Area Population Tables. In the Performance Measures section, MSL chose six measures to highlight. This section provides summaries, general descriptions, and identifies factors that may affect these measures.

The data in the General/Service Area Population Tables is presented in two ways -- by county and by city. The same information is provided by grouping libraries by population, allowing for easy comparisons of similar libraries.

We wish you well in your efforts to continually improve library services in Montana. If we can provide assistance, please do not hesitate to contact us.

Sincerely,

Karen Strege

Karen Strege
Montana State Librarian

Statewide Library Performance Indicators

Core Performance Measures -- 2
General and Service Area Population Tables -- 2
Interpreting Measures -- 2
Visits Per Capita -- 3
Circulation Per Capita -- 4
Collection Turnover Rate -- 5
Income Per Capita -- 6
Expenditures Per Capita -- 7

Statewide Library Performance Indicators

Core Perfomance Measures

Because of their potential applications to library services planning and because of their usefulness as general indicators of library service on a statewide basis, six measures have been designated as core performance measures:

- Visits per capita
- Expenditures per capita
- Holdings per capita
- Turnover rate
- Circulation per capita
- Income per capita

General and Service Area Population Tables

The following pages provide summary data for these performance measures on a statewide basis. The population of the library service area is also provided. For each measure, the text gives a general description and identifies some of the factors affecting the measure.

In this publication, the general tables are categorized by the county in which the public library resides and report basic library information on a library-by-library basis.

Interpreting Measures

Although community and individual library circumstances vary, the core measures and general tables can assist Montana's public librarians and trustees as they evaluate library activities and plan improvements in library services. We offer the following suggestions:

- Analyze the library's statistics in terms of library mission, goals, and objectives. Libraries, even in communities of similar size, have varying funding patterns and community expectations for service. A reference and resource library will show a different pattern of statistics than a popular materials library.
- Realize that online databases and the Internet have changed library use patterns. Although statewide and national data have not yet been collected on this service, individual libraries should be tracking this use.
- Remember that performance measure scores are not absolutes. Performance measures are not necessarily precise. Most measures are calculated in percentages and ratios. Do not be too concerned about "decimal points."
- Use performance measures in context. There are not "right" or "wrong" scores for performance measures. One performance measure alone cannot tell a complete story. Performance measure scores should be interpreted in context with each other and with the library's overall service program and budget.
- Exercise patience in working toward improving performance measure scores. Changing a library's score on a performance measure is usually not accomplished overnight. Such a change usually requires work over an extended period. Improving a library's score on selected performance measures has to be a cooperative effort among the library director, library trustees, and the local community.

Visits Per Capita - SFY 2002

Visits Per Capita relates the number of people visiting the library to the population served. It can be thought of as representing the average number of times during a year that a member of the community uses the library. Visits Per Capita is calculated by dividing the library total attendance by the service area population.

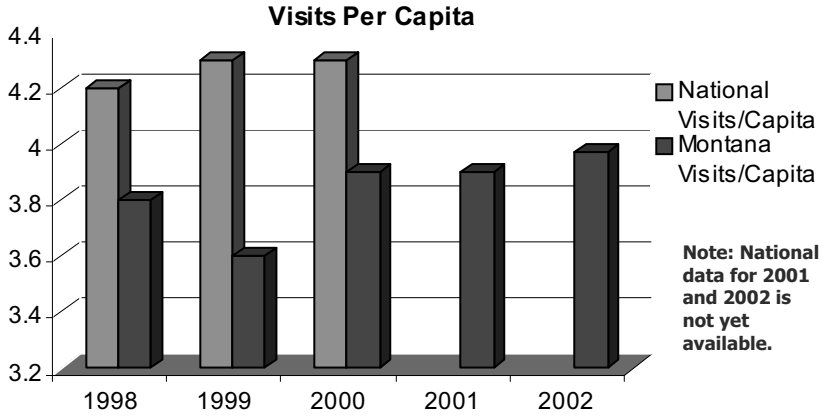
Factors that Influence the Measure

- Fluctuation in the size of the service area population
- Library hours of service
- Physical arrangement and convenience of library facilities
- Community awareness of library service
- Special programs--prizes, reading programs, etc.
- Library circulation or acquisitions policies, loan period, fines
- Age, condition, and size of the library's collection

Interpretation and Use

Visits Per Capita is one measure of the community's use of the library, whether for materials, programs, or meetings. A high score on the measure indicates heavy use of the facility. A low score may indicate several things. For example:

1. The hours the library is open does not fit the needs of the community;
2. The library's collection and/or programming does not meet the community's interests or needs;
3. Residents may be unaware of what the library has to offer;
4. The facility may be uninviting.



Population Category	Number of Libraries	Service Population	Visits Per Capita High	Visits Per Capita Average	Visits Per Capita Low
1,199 and Under	9	7,130	19.51	1.35	0.70
1,200-1,999	12	19,966	13.27	0.26	1.30
2,000-3,499	11	28,442	11.21	0.31	1.44
3,500-4,999	13	53,951	16.67	0.19	0.79
5,000-9,999	15	115,390	8.61	0.17	0.87
10,000-24,999	12	166,798	7.18	0.55	2.45
Over 25,000	7	508,625	7.33	0.70	2.46
Statewide:	**79**	**900,302**	**19.51**	**3.97**	**0.70**

Circulation Per Capita - SFY 2002

Circulation Per Capita relates the number of items a library circulates to the population served. It can be thought of as representing the average number of items checked out in a year by a member of the community. Circulation Per Capita is calculated by dividing the library's total annual circulation by the service area population.

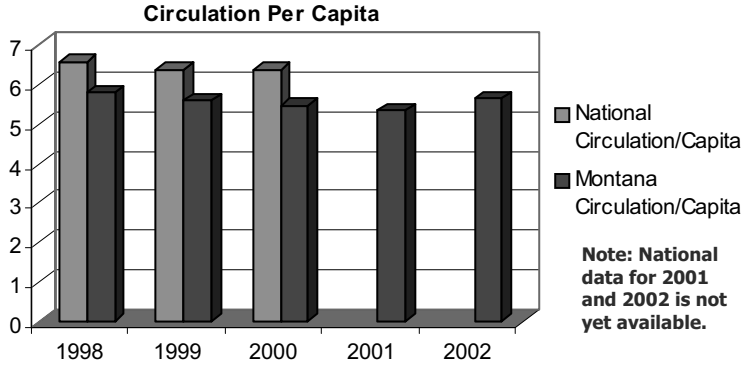
Factors that Influence the Measure

- Fluctuation in the size of the service area population
- Increase or decrease in the number of items circulated annually
- Library circulation or acquisitions policies, loan period, fines
- Special programs--prizes, reading programs, etc.
- Community awareness of library service
- Library hours of service
- Number of library users
- Age, condition, and size of the library's collection
- Physical arrangement and convenience of library facilities

Interpretation and Use

Circulation Per Capita is another measure of the community's use of the library. A high score on this measure indicates heavy use of the library's circulating materials. A low score may indicate several things. For example:

1. The library's collection may not meet community needs or interests;
2. Community residents may be unaware of the library's resources;
3. The library may have an extensive collection of non-circulating materials.



Population Category	Number of Libraries	Service Population	Circulation Per Capita		
			High	Average	Low
1,199 and Under	9	7,130	16.61	9.69	3.76
1,200-1,999	12	19,966	9.44	5.21	2.22
2,000-3,499	11	28,442	10.82	6.48	2.55
3,500-4,999	13	53,951	7.09	4.78	0.42
5,000-9,999	15	115,390	12.57	4.97	1.05
10,000-24,999	12	166,798	7.93	4.47	1.13
Over 25,000	7	508,625	9.65	6.21	2.79
Statewide:	**79**	**900,302**	**16.61**	**5.66**	**0.42**

Collection Turnover Rate - SFY 2002

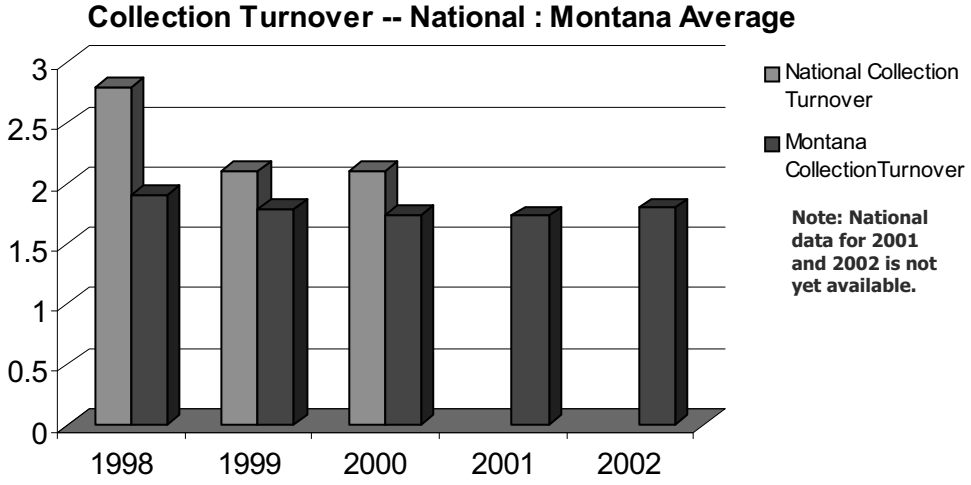
Turnover Rate measures the activity of a library's collection, indicating the number of times each unit of library material would have circulated during the year if circulation had been spread evenly throughout the collection. It is calculated by dividing the library's total annual circulation by total library holdings.

Factors that Influence the Measure

- Increase or decrease in the annual circulation
- Circulation policies--loan period, fines
- Library acquisitions and collection development policies
- Special programs--prizes, reading program, etc.
- Community awareness of library service
- Library hours of service
- Number of library users
- Age, condition, and size of the library's collection
- Physical arrangement and convenience of library facilities

Interpretation and Use

This measure related strongly to the goals each library has set for meeting the service needs of its community. A library which emphasizes the circulation of popular reading materials will have a higher Turnover Rate than a library which emphasizes subject depth in its collection and has an extensive reference collection.



Population Category	Number of Libraries	Circulation	Collection	Turnover Rate Average	High	Low
1,199 and Under	9	69,092	97,793	0.71	1.33	0.28
1,200-1,999	12	103,969	140,088	0.74	2.29	0.34
2,000-3,499	11	184,162	188,294	0.98	1.48	0.55
3,500-4,999	13	257,934	296,204	0.87	1.67	0.18
5,000-9,999	15	573,790	438,799	1.31	2.44	0.39
10,000-24,999	12	745,536	489,247	1.52	2.81	0.46
Over 25,000	7	3,159,758	1,178,918	2.68	4.78	0.96
Statewide:	**79**	**5,094,241**	**2,829,343**	**1.80**	**4.78**	**0.18**

Income Per Capita - SFY 2002

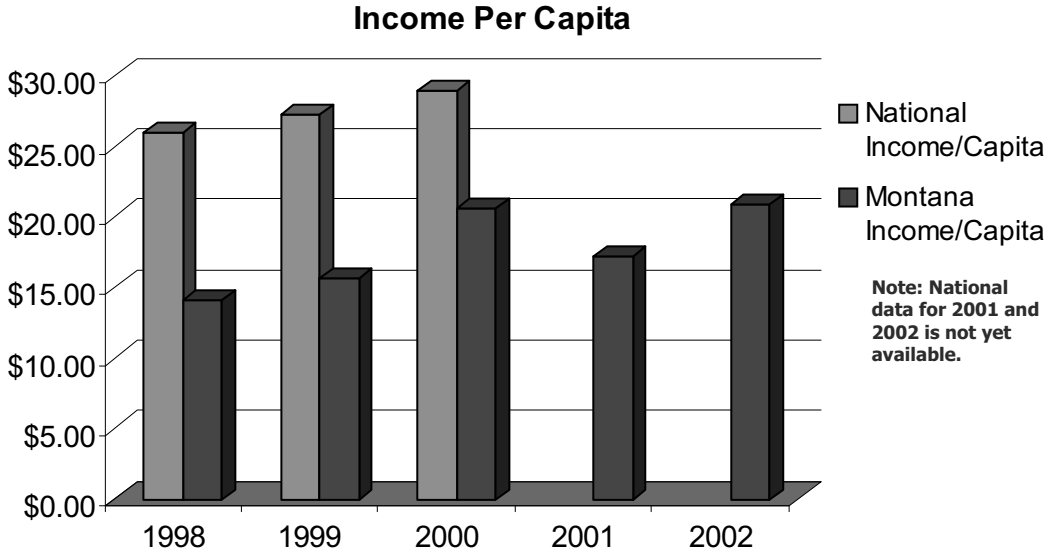
Income Per Capita relates library income to the population of the service area served. It is obtained by dividing the library's total income by the service area population. Figures shown here are based on each library's **total income**, which includes city, district, county, state, federal, and other income.

Factors that Influence the Measure

- Overall local economic conditions
- Changing tax base
- Demands on local government for all public services in general and library service specifically
- Community perception of the importance and value of library service
- Political climate
- Changes in the availability of state and federal grants

Interpretation and Use

Knowing the extent to which a city, district or county government is providing the financial support possible for its library is valuable information for public librarians and their boards.



Population Category	Number of Libraries	Service Population	Income Per Capita		
			High	Average	Low
1,199 and Under	9	7,130	$75.51	$28.69	$3.70
1,200-1,999	12	19,966	$43.99	$17.78	$7.37
2,000-3,499	11	28,442	$54.08	$23.66	$8.35
3,500-4,999	13	53,951	$31.20	$17.97	$12.64
5,000-9,999	15	115,390	$33.06	$14.45	$1.81
10,000-24,999	12	166,798	$29.65	$17.75	$11.39
Over 25,000	7	508,625	$70.32	$23.59	$15.39
Statewide:	**79**	**900,302**	**$75.51**	**$20.92**	**$1.81**

Expenditures Per Capita - SFY 2002

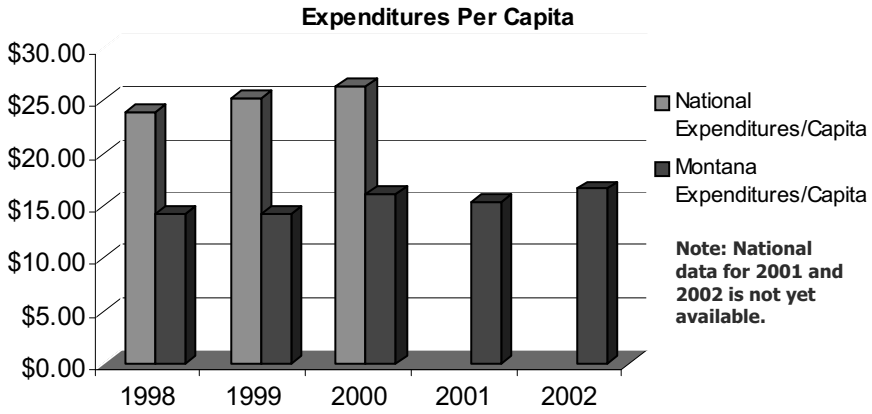
Expenditures Per Capita relates library expenditures to the population of the service area served. It is obtained by dividing the library's total expenditures by the service area population. Figures shown here are based on each library's **operating** expenditures, such as personnel, collections and operations.

Factors that Influence the Measure

- Overall local economic conditions
- Changes in the tax base of local government
- Demands on local government for public services in general and library service specifically
- Community perception of the importance and value of library services
- Political climate
- The extent to which certain services (custodial, utility, administrative functions, etc.) are charged to the library's budget.
- Changes in the availability of state and federal grants

Interpretation and Use

In general, Expenditures Per Capita reflects the community's financial support in relation to its size, although operating expenditures from other sources of income are included. Communities with a lower tax base usually must make a proportionally greater effort to support adequate library services. Although Expenditures Per Capita must be interpreted in conjunction with other measures to document the library's performance, it can provide important information for use by elected officials and the general public as they review the library's budget.



Population Category	Number of Libraries	Service Population	Expenditures Per Capita High	Average	Low
1,199 and Under	9	7,130	$75.19	$25.90	$4.19
1,200-1,999	12	19,966	$25.10	$14.76	$7.69
2,000-3,499	11	28,442	$40.08	$22.11	$11.54
3,500-4,999	13	53,951	$21.31	$14.16	$4.36
5,000-9,999	15	115,390	$25.40	$13.33	$1.52
10,000-24,999	12	166,798	$25.06	$16.15	$10.91
Over 25,000	7	508,625	$26.30	$17.42	$13.70
Statewide:	**79**	**900,302**	**$75.19**	**$16.62**	**$1.52**

Note: Capital Outlays, which are usually one time large sums for projects such as new buildings, are not included here.
