Letter from the State Librarian

Today's libraries play a key role in recognizing and meeting the needs of their communities. As a result, libraries are active and responsive community members and agents for change. In the world of community building, local libraries have a unique and powerful role. To demonstrate the importance of this role, we like to tell compelling human interest stories but, to the right audience, statistics are a persuasive tool to demonstrate the public value of libraries to the communities they serve.

This report contains statistical information reported by all 82 legally established public libraries in Montana for the reporting period July 2012 through June 2013. The information reported by libraries is augmented by additional data, including census populations. I hope that you find ways to use the information contained in this report to analyze, plan and develop improved public library services for your communities.

The context of the statistics is important regardless of how you use them. If your library's circulation has decreased significantly from year to year, statistics might easily illustrate a parallel with budget reductions. However, there might not be an obvious answer, requiring an investigation of these changes to remedy problems or identify beneficial activities. Such analysis should use statistics from as many years as possible to spot long-term trends.

If you use the measures to compare your library to other libraries, you should use similar libraries so that the comparisons are meaningful. This report is designed to help you do so by dividing libraries into groups that serve similar populations. However, even within these population groups, wide variations exist between individual libraries. Before using the statistics to make comparisons, check that similarities exist in other factors, such as income, hours open, collections, or mission, goals, and objectives.

The State Library has also made available demographic data from the 2010 Census by library or county. This data, which currently includes population and housing statistics, offer unique perspective on the communities served by Montana libraries that may better shape library programs and services and will inform future planning. The charts can be easily downloaded into local reports. Please note that the library level data is based on service area population. County data is based on county population. This data is available for you at: http://msl.mt.gov/For_Librarians/For_Public_Librarians/Statistics/reports/default.asp.

In addition to making these statistics available to you, MSL cooperates with the Federal-State Cooperative System (FSCS) program, which develops and compiles national public library statistics for the United States. MSL provides Montana information to the FSCS so that policy-makers, funders, trustees, and librarians can identify trends and opportunities in the country's library services.

We wish you well in your efforts to demonstrate the public value your library services bring to your community and to continually improve library services in Montana. If we can provide assistance, please do not hesitate to contact us.

Sincerely,

Jennie Stapp
Montana State Librarian

Statewide Library Performance Indicators

Core Performance Measures

Because of their potential applications to library services planning and because of their usefulness as general indicators of library service on a statewide basis, six measures have been designated as core performance measures:

- Visits per capita
- Expenditures per capita
- Holdings per capita
- Turnover rate
- Circulation per capita
- Income per capita

General and Service Area Population Tables

The following pages provide summary data for these performance measures on a statewide basis. The population of the library service area is also provided. For each measure, the text gives a general description and identifies some of the factors affecting the measure.

In this publication, the general tables are categorized by the county in which the public library resides and report basic library information on a library-by-library basis.

Interpreting Measures

Although community and individual library circumstances vary, the core measures and general tables can assist Montana's public librarians and trustees as they evaluate library activities and plan improvements in library services. We offer the following suggestions:

Analyze the library's statistics in terms of library mission, goals, and objectives. Libraries, even in communities of similar size, have varying funding patterns and community expectations for service. A reference and resource library will show a different pattern of statistics than a popular materials library.

- Realize that online databases and the Internet have changed library use patterns. Although statewide and national data have not yet been collected on this service, individual libraries should be tracking this use.
- Remember that performance measure scores are not absolutes. Performance measures are not necessarily precise. Most measures are calculated in percentages and ratios. Do not be too concerned about "decimal points."
- Use performance measures in context. There are not "right" or "wrong" scores for performance measures. One performance measure alone cannot tell a complete story. Performance measure scores should be interpreted in context with each other and with the library's overall service program and budget.
- Exercise patience in working toward improving performance measure scores. Changing a library's score on a performance measure is usually not accomplished overnight. Such a change usually requires work over an extended period. Improving a library's score on selected performance measures has to be a cooperative effort among the library director, library trustees, and the local community.

Statewide Library Performance Indicators

Visits Per Capita

Visits Per Capita relates the number of people visiting the library to the population served. It can be thought of as representing the average number of times during a year that a member of the community uses the library. Visits Per Capita is calculated by dividing the library total attendance by the service area population.

Factors that Influence the Measure

- Fluctuation in the size of the service area population
- Library hours of service
- Physical arrangement and convenience of library facilities
- Public access computing
- Library-provided Wireless Internet Access
- Remote access options to catalogs, services, and databases
- Community awareness of library service
- Special programs--prizes, reading programs, etc.
- Library circulation or acquisitions policies, loan period, fines
- Age, condition, and size of the library's collection

Interpretation and Use

Visits Per Capita is one measure of the community's use of the library, whether for materials, programs, or meetings. A high score on the measure indicates heavy use of the facility. A low score may indicate several things. For example:

- The hours the library is open does not fit the needs of the community;
- The library's collection and/or programming does not meet the community's interests or needs;
- Residents may be unaware of what the library has to offer;
- The facility may be uninviting.
- Patrons may be utilizing the library's online options as opposed to physically attending the facility.

Statewide Library Performance Indicators

Circulation Per Capita

Circulation Per Capita relates the number of items a library circulates to the population served. It can be thought of as representing the average number of items checked out in a year by a member of the community. Circulation Per Capita is calculated by dividing the library's total annual circulation by the service area population.

Factors that Influence the Measure

- Fluctuation in the size of the service area population
- Increase or decrease in the number of items circulated annually
- Library circulation or acquisitions policies, loan period, fines
- Special programs--prizes, reading programs, etc.
- Community awareness of library service
- Library hours of service
- Number of library users
- Age, condition, and size of the library's collection
- Physical arrangement and convenience of library facilities

Interpretation and Use

- The library's collection may not meet community needs or interests;
- Community residents may be unaware of the library's resources;
- The library may have an extensive collection of non-circulating materials.

Circulation Per Capita
Five Year Increments - 1972 thru 2012

Circulation Per Capita - 2002 thru 2012

Statewide Library Performance Indicators

Collection Turnover Rate

Turnover Rate measures the activity of a library's collection, indicating the number of times each unit of library material would have circulated during the year if circulation had been spread evenly throughout the collection. It is calculated by dividing the library's total annual circulation by total library holdings.

Factors that Influence the Measure

- Increase or decrease in the annual circulation
- Circulation policies--loan period, fines
- Library acquisitions and collection development policies
- Special programs--prizes, reading program, etc.
- Community awareness of library service
- Library hours of service
- Number of library users
- Age, condition, and size of the library's collection
- Physical arrangement and convenience of library facilities

Interpretation and Use

This measure related strongly to the goals each library has set for meeting the service needs of its community. A library which emphasizes the circulation of popular reading materials will have a higher Turnover Rate than a library which emphasizes subject depth in its collection and has an extensive reference collection.

Statewide Library Performance Indicators

Income Per Capita

Income Per Capita relates library income to the population of the service area served. It is obtained by dividing the library's total income by the service area population. Figures shown here are based on each library's total income, which includes city, district, county, state, federal, and other income.

Factors that Influence the Measure

- Overall local economic conditions
- Changing tax base
- Demands on local government for all public services in general and library service specifically
- Community perception of the importance and value of library service
- Political climate
- Changes in the availability of state and federal grants

Interpretation and Use

Knowing the extent to which a city, district or county government is providing the financial support possible for its library is valuable information for public librarians and their boards.
