

My First Census 2020 Photo Shoot

Children born after April 1, 2010 are all being counted for the first time in 2020. Use this photo prop activity to help to celebrate a child's first Census.

Print the bowler graphic onto white paper and invite children to color it with crayons or decorate with glitter pens. Affix the image to poster board and cut out around the outline. Tape a bamboo skewer or thin dowel to one side of the back of the image so that the child can hold it above their head as a photo prop. Find a suitable back drop for your photo shoot with good lighting.

Use family's phones to take digital photos. Ask for permission before taking or posting photos of children on library social media or websites.
