Montana Spatial Data Infrastructure:
Transportation Framework Web Services Changes

Following the recent announcement of the release of a new Montana Transportation Framework database, the Montana State Library (MSL) will be deleting web services based on the previous version of the Transportation Framework from our Esri Managed Cloud Services environment: https://gisservicemt.gov/arcgis/rest/services.

These changes trigger our 90-day notification policy.

Web service changes:

MSDI_Framework/Roads	Deprecated – Retiring August 31, 2025
MSDI_Framework/Transportation	Deprecated – Retiring August 31, 2025
MSDI_Framework/MontanaTransportation	New – ready to use

These changes will likely cause impacts to workflows, applications, and map products. We anticipate impacts to items using our services in ArcGIS Online: web maps, layers, story maps, etc.

For information about the MSDI Transportation Framework and how to download the data/metadata please visit: https://msl.mt.gov/geoinfo/msdi/transportation/.
