Letter from the State Librarian

Darlene Staffeldt
State Librarian

This report contains statistical information for all 80 legally established public libraries in Montana. All statistics are for the reporting period July 2006 through June 2007 and with few exceptions (i.e. service population which is pulled from census statistics) are submitted by the libraries themselves. The State Library cooperates with the Federal-State Cooperative System (FSCS) program, which develops and compiles national public library statistics for the United States. MSL provides Montana information to the FSCS so that policy-makers, funders, trustees, and librarians can identify trends in the country's libraries services.

I hope that Montana public librarians, trustees, and friends find this report of use to improve the quality and effectiveness of public library service. This information can be useful both in evaluating past efforts and in many planning activities. One way to evaluate your library's performance is to compare measures from year to year. Another way to evaluate is to compare your library's performance with other similar libraries.

The context of the statistics is important for both types of use. If your library's circulation has decreased significantly from year to year, you might easily find the answer if you have experienced budget reductions. However, you may not find an easy answer and you must investigate these changes to remedy problems or continue beneficial activities. Such analysis should use statistics from as many years as possible to spot long-term trends.

If you use the measures to compare your library to other libraries, you should use similar libraries so that the comparisons are meaningful. This report is designed to help you do so by dividing libraries into groups that serve similar populations. However, even within these population groups, wide variations exist between individual libraries. Before using the statistics to make comparisons, check that similarities exist in other factors, such as income, hours open, collections, or mission, goals, and objectives.

The information in the report is presented in two main sections -- performance measures; and general tables. In the first section, MSL chose six measures to highlight. This section provides summaries, general descriptions, and identifies factors that may affect these measures.

The information in the second section, general tables, is presented in two ways. The first is by county name and then by city. The same information is provided by grouping libraries by population, allowing for easy comparisons of similar libraries. New this year, you will find some summary charts, top 5 lists, and pie graphs throughout this publication.

We wish you well in your efforts to continually improve library services in Montana. If we can provide assistance, please do not hesitate to contact us.

Sincerely,

Darlene Staffeldt

Statewide Library Performance Indicators

Core Performance Measures	1
General and Service Area Population Tables	1
Interpreting Measures	1
Visits Per Capita	2
Circulation Per Capita	3
Collection Turnover Rate	4
Income Per Capita	5

Statewide Library Performance Indicators

Core Performance Measures

Because of their potential applications to library services planning and because of their usefulness as general indicators of library service on a statewide basis, six measures have been designated as core performance measures:

- Visits per capita
- Expenditures per capita
- Holdings per capita
- Turnover rate
- Circulation per capita
- Income per capita

General and Service Area Population Tables

The following pages provide summary data for these performance measures on a statewide basis. The population of the library service area is also provided. For each measure, the text gives a general description and identifies some of the factors affecting the measure.

In this publication, the general tables are categorized by the county in which the public library resides and report basic library information on a library-by-library basis.

Interpreting Measures

Although community and individual library circumstances vary, the core measures and general tables can assist Montana's public librarians and trustees as they evaluate library activities and plan improvements in library services. We offer the following suggestions:

- Analyze the library's statistics in terms of library mission, goals, and objectives. Libraries, even in communities of similar size, have varying funding patterns and community expectations for service. A reference and resource library will show a different pattern of statistics than a popular materials library.

- Realize that online databases and the Internet have changed library use patterns. Although statewide and national data have not yet been collected on this service, individual libraries should be tracking this use.

- Remember that performance measure scores are not absolutes. Performance measures are not necessarily precise. Most measures are calculated in percentages and ratios. Do not be too concerned about "decimal points."

- Use performance measures in context. There are not "right" or "wrong" scores for performance measures. One performance measure alone cannot tell a complete story. Performance measure scores should be interpreted in context with each other and with the library's overall service program and budget.

- Exercise patience in working toward improving performance measure scores. Changing a library's score on a performance measure is usually not accomplished overnight. Such a change usually requires work over an extended period. Improving a library's score on selected performance measures has to be a cooperative effort among the library director, library trustees, and the local community.

Visits Per Capita - SFY 2007

Visits Per Capita relates the number of people visiting the library to the population served. It can be thought of as representing the average number of times during a year that a member of the community uses the library. Visits Per Capita is calculated by dividing the library total attendance by the service area population.

Factors that Influence the Measure

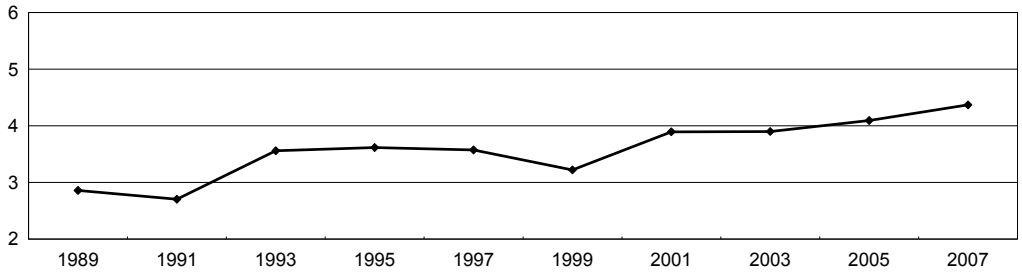
- Fluctuation in the size of the service area population
- Library hours of service
- Physical arrangement and convenience of library facilities
- Community awareness of library service
- Special programs--prizes, reading programs, etc.
- Library circulation or acquisitions policies, loan period, fines
- Age, condition, and size of the library's collection

Interpretation and Use

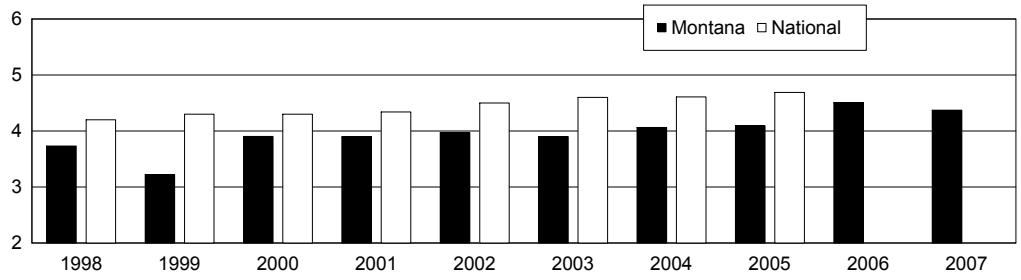
Visits Per Capita is one measure of the community's use of the library, whether for materials, programs, or meetings. A high score on the measure indicates heavy use of the facility. A low score may indicate several things. For example:

- The hours the library is open does not fit the needs of the community;
- The library's collection and/or programming does not meet the community's interests or needs;
- Residents may be unaware of what the library has to offer;
- The facility may be uninviting.

Visits Per Capita
Five Year Increments - 1989 thru 2007



Visits Per Capita - 1998 thru 2007



Circulation Per Capita - SFY 2007

Circulation Per Capita relates the number of items a library circulates to the population served. It can be thought of as representing the average number of items checked out in a year by a member of the community. Circulation Per Capita is calculated by dividing the library's total annual circulation by the service area population.

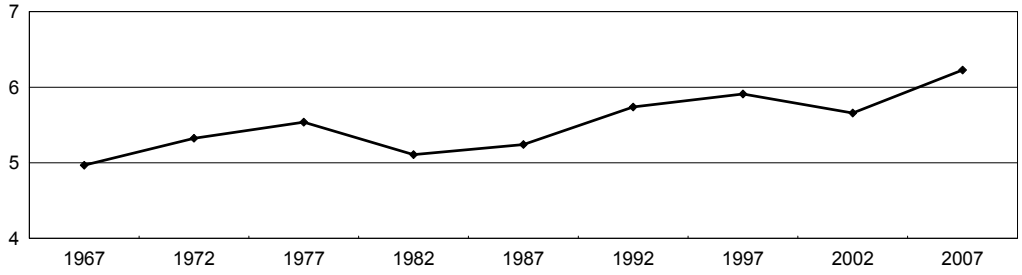
Factors that Influence the Measure

- Fluctuation in the size of the service area population
- Increase or decrease in the number of items circulated annually
- Library circulation or acquisitions policies, loan period, fines
- Special programs--prizes, reading programs, etc.
- Community awareness of library service
- Library hours of service
- Number of library users
- Age, condition, and size of the library's collection
- Physical arrangement and convenience of library facilities

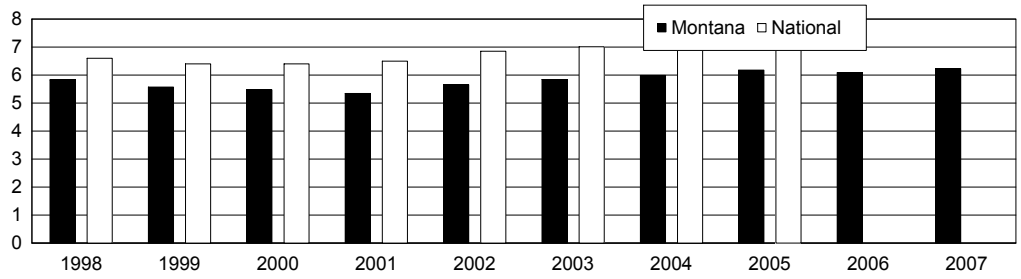
Interpretation and Use

- The library's collection may not meet community needs or interests;
- Community residents may be unaware of the library's resources;
- The library may have an extensive collection of non-circulating materials.

Circulation Per Capita
Five Year Increments - 1967 thru 2007



Circulation Per Capita - 1998 thru 2007



Collection Turnover Rate - SFY 2007

Turnover Rate measures the activity of a library's collection, indicating the number of times each unit of library material would have circulated during the year if circulation had been spread evenly throughout the collection. It is calculated by dividing the library's total annual circulation by total library holdings.

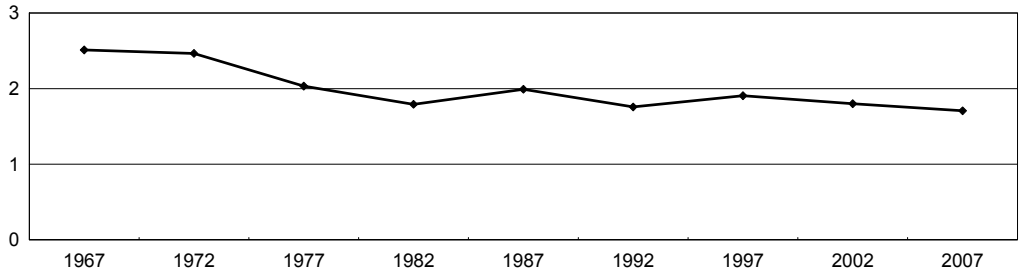
Factors that Influence the Measure

- Increase or decrease in the annual circulation
- Circulation policies--loan period, fines
- Library acquisitions and collection development policies
- Special programs--prizes, reading program, etc.
- Community awareness of library service
- Library hours of service
- Number of library users
- Age, condition, and size of the library's collection
- Physical arrangement and convenience of library facilities

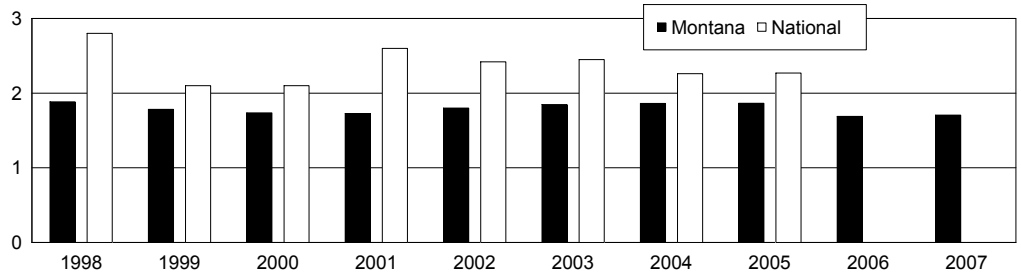
Interpretation and Use

This measure related strongly to the goals each library has set for meeting the service needs of its community. A library which emphasizes the circulation of popular reading materials will have a higher Turnover Rate than a library which emphasizes subject depth in its collection and has an extensive reference collection.

Collection Turnover Per Capita
Five Year Increments - 1967 thru 2007



Collection Turnover Per Capita - 1998 thru 2007



Income Per Capita - SFY 2007

Income Per Capita relates library income to the population of the service area served. It is obtained by dividing the library's total income by the service area population. Figures shown here are based on each library's **total income**, which includes city, district, county, state, federal, and other income.

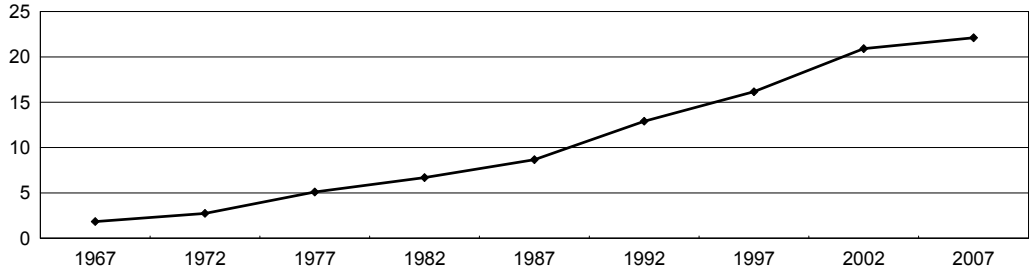
Factors that Influence the Measure

- Overall local economic conditions
- Changing tax base
- Demands on local government for all public services in general and library service specifically
- Community perception of the importance and value of library service
- Political climate
- Changes in the availability of state and federal grants

Interpretation and Use

Knowing the extent to which a city, district or county government is providing the financial support possible for its library is valuable information for public librarians and their boards.

Income Per Capita
Five Year Increments - 1967 thru 2007



Income Per Capita - 1998 thru 2007

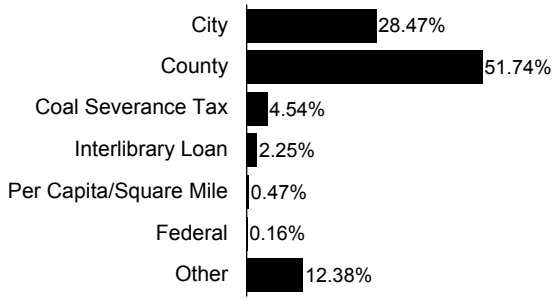
Appendix A

2007 Average Revenue and Expense Charts

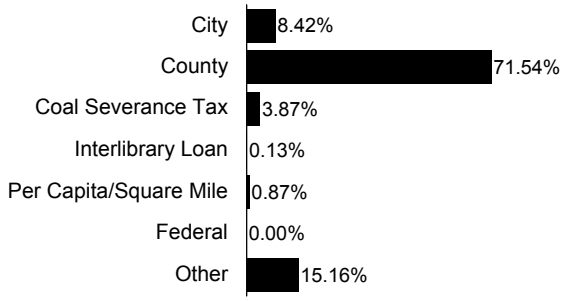
The charts show Average Revenue and Expenses by Service Population. This information is intended as a tool to assist in the interpretation of the Public Library Statistics. For more information on possible ways to interpret these charts, please contact the Montana State Library.

Revenue

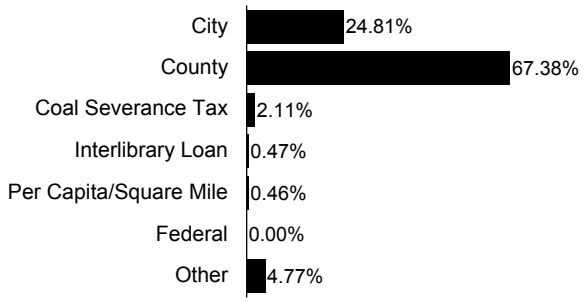
Service Population - 1,199 and Under



Service Population - 1,200 - 1,999

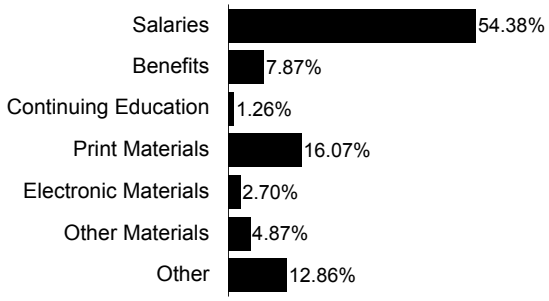


Service Population - 2,000 - 3,499

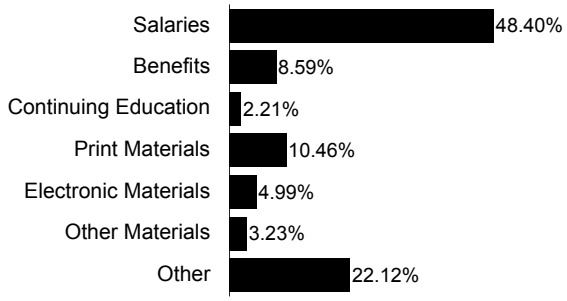


Expense

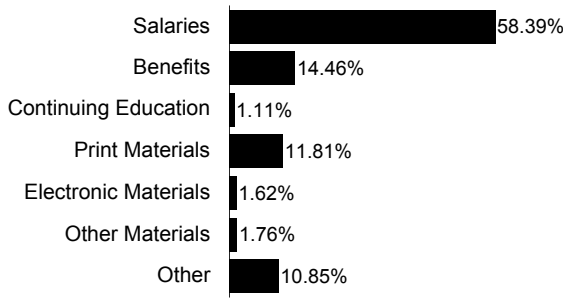
Service Population - 1,199 and Under



Service Population - 1,200 - 1,999



Service Population - 2,000 - 3,499

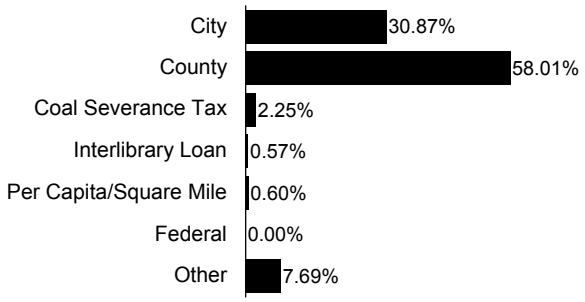


Appendix A

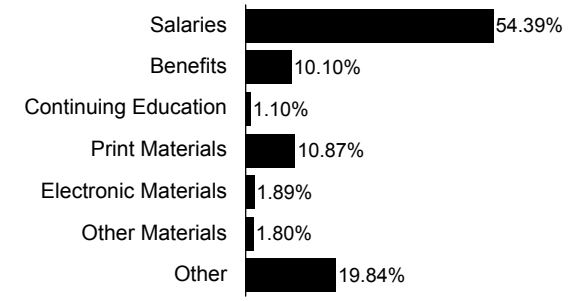
2007 Average Revenue and Expense Charts

Revenue

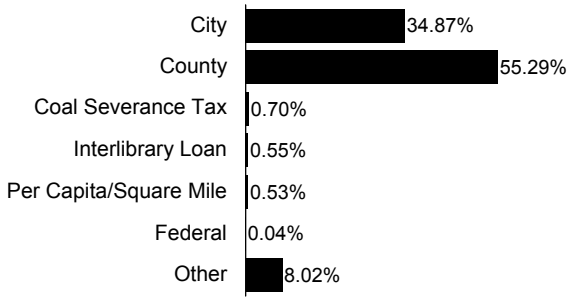
Service Population - 3,500 - 4,999



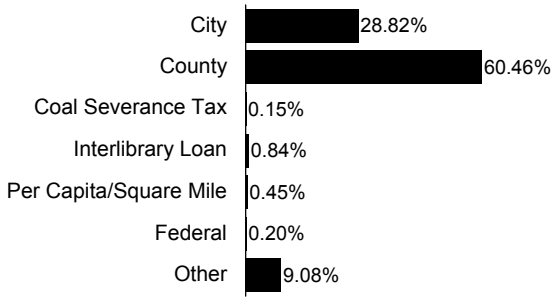
Service Population - 5,000 - 9,999



Service Population - 10,000 - 24,999

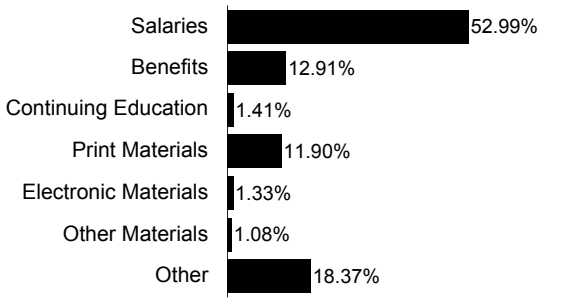


Service Population - Over 25,000

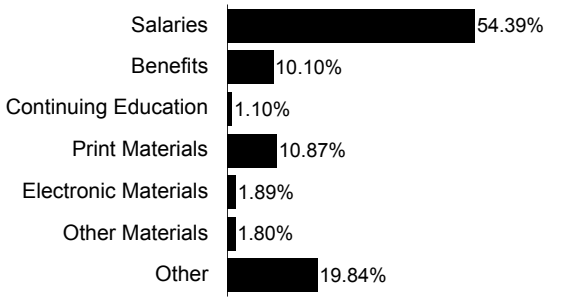


Expense

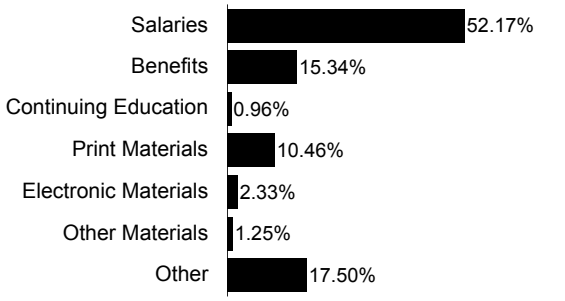
Service Population - 3,500 - 4,999



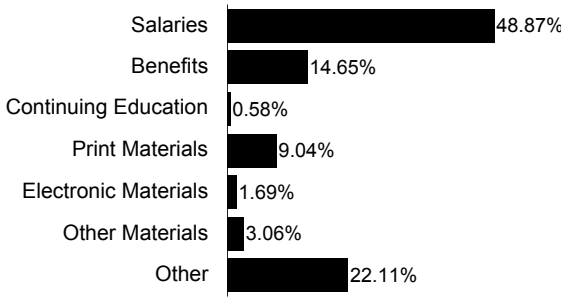
Service Population - 5,000 - 9,999



Service Population - 10,000 - 24,999



Service Population - Over 25,000



This publication is available in alternative formats upon request. One hundred and fifty copies of the Public Library Statistics were published at state expense. Publication and distribution expense information are on file with the Montana Department of Administration.
